In the coming months, the Location History setting name will change to Timeline. If Location History is turned on for your account, you may find Timeline in your app and account settings. Learn more. Location History is a Google Account setting that creates Timeline, a personal map that helps you remember: Places you go Routes to destinations Trips you take It can also give you personalized experiences across Google based on where you go. When Location History is on, even when Google apps aren't in use, your precise device location is regularly saved to: Your devices Google servers To make Google experiences helpful for everyone, we may use your data to: Show information based on anonymized location data, such as: Popular times Environmental insights Detect and prevent fraud and abuse. Improve and develop Google services, such as ads products. Help businesses determine if people visit their stores because of an ad, if you have Web & App Activity turned on. We share only anonymous estimates, not personal data, with businesses. This activity can include info about your location from your device's general area and IP address. Learn more about how Google uses location data. Things to know about Location History: Location History is off by default. We can only use it if you turn Location History on. You can turn off Location History at any time in your Google Account's Activity controls. You can review and manage your Location History. You can: Important: Some of these steps work only on Android 8.0 and up. Learn how to check your Android version. You can turn off Location History for your account at any time. If you use a work or school account, your administrator needs to make this setting available for you. If they do, you'll be able to use Location History as any other user. Go to the "Location History" section of your Google Account. Choose whether your account or your devices can report Location History to Google. Your account and all devices: At the top, turn Location History on or off. Only a certain device: Under "This device" or "Devices on this account," turn the device on or off. Google can estimate your location with: Signals like Wi-Fi and mobile networks GPS Sensor information Your device location may also periodically be used in the background. When Location History is on, even when Google apps aren't in use, your device's precise location is regularly saved to: Your devices Google servers When you're signed in with your Google Account, it saves the Location History of each device with the setting "Devices on this account" turned on. You can find this setting in the Location History settings on your Google Account. You can choose which devices provide their location data to Location History. Your settings don't change for other location services on your device, such as: Google Location Services Location Sharing Find My Device When Location History is off Your device doesn't save its location to your Location History. You may have previous Location History data in your account. You can manually delete it anytime. Your settings don't change for other location services on your device, such as: Google Location Services Location Sharing Find My Device If settings like Web and App Activity are on but you turn off Location History or delete location data from Location History, your Google Account may still save location data as part of your use of other Google sites, apps, and services. This activity can include info about your location from your device's general area and IP address. Delete Location History You can manage and delete your Location History information with Google Maps Timeline. You can choose to delete all of your history, or only parts of it. Important: When you delete Location History information from Timeline, you won't be able to see it again. On your Android device, open the Google Maps app . Tap your profile picture or initial . Your timeline . In the top right, tap More . Settings and privacy. Under "Location settings," tap Delete all Location History. Follow the on-screen instructions. On your Android device, open the Google Maps app . Tap your profile picture or initial . Your timeline . Tap More Settings and privacy. Under "Location settings," tap Delete Location History range. Follow the on-screen instructions. On your Android device, open the Google Maps app . Tap your profile picture or initial . Your timeline . Tap Show calendar . Select which day you want to delete. Tap More Delete day. Follow the on-screen instructions. On your Android device, open the Google Maps app . Tap your profile picture or initial . Your timeline . Tap Show calendar . Select the day with a stop you want to delete. Tap the stop you want to delete Delete . Follow the on-screen instructions. In your web browser, open your Google Maps Timeline. Tap Delete . Follow the on-screen instructions. In your web browser, open your Google Maps Timeline. Choose a year, month, and day you want to delete. Tap Delete . Follow the on-screen instructions. In your web browser, open your Google Maps Timeline. Tap Delete . Follow the on-screen instructions. Automatically delete your Location History You can choose to automatically delete Location History that's older than 3 months, 18 months, or 36 months. On your Android device, open the Google Maps app . Tap your profile picture or initial . Your timeline . At the top right, tap More Settings and privacy. Scroll to "Location settings." Tap Automatically delete Location History. Follow the on-screen instructions. In your web browser, open your Google Maps Timeline. At the bottom right, click Settings . Automatically delete Location History. Follow the on-screen instructions. What happens after you delete some or all of your Location History, personalized experiences across Google may degrade or be lost. For example, you may lose: Recommendations based on places you visit Real-time information about when best to leave for home or work to beat traffic Important: If you have other settings like Web & App Activity turned on and you pause Location History or delete location data from Location History, you may still have location data saved in your Google Account as part of your use of other Google sites, apps, and services. For example, location data may be saved as part of activity on Search and Maps when your Web & App Activity setting is on, and included in your photos depending on your camera app settings. Web & App Activity can include info about your location from your device's general area and IP address. Learn about use & diagnostics for Location History After you turn on Location History, your device may send diagnostic information to Google about what works or doesn't work for Location History. Google processes any information it collects under Google's privacy policy. What information your device could share Your device may send information to Google to help improve Google apps, products, and Android devices. For example, Google can use information to improve: Battery life: We estimate what apps use the most battery on your device to reduce battery consumption for commonly used features. Location accuracy: We use location sensors and settings to improve location estimates for apps and services. Information your phone could send to Google may include: Quality and length of your connections to: Mobile networks GPS Wi-Fi networks Bluetooth State of your location settings Restarts and crash reports Google apps Main menu Websites that you've visited are recorded in your browsing history. You can check or delete your browsing history and find related searches in Chrome. You can also resume browsing sessions on other devices if you're signed in and have your history synced to your Google Account. When you delete your browsing history in Chrome, it's also deleted on your devices where you're signed in to Chrome and have your history synced to your Google Account. Tip: Separately, you can also delete your Google search history from your account. What your Chrome history lists Your history lists the pages that you've visited on Chrome in the last 90 days. It doesn't store: Chrome pages, such as chrome://settings Pages that you've visited while you browse privately in Incognito mode Pages that have been deleted from your browsing history Tips: If you're signed in to Chrome and sync your history, then your history also shows pages that you've visited on your other devices. If you don't want Chrome to save your browsing history, you can browse in Incognito mode. Find your Chrome history On your computer, open Chrome. At the top right, select More . Select History history. Review history: Enter what you want to find in the search bar . By date . By group . Tip: If you use a Chromebook at work or school, your network administrator can turn off browsing history. If history is off, your history won't list pages that you've visited. Learn about using a managed Chrome device. Search your browsing history from the address bar On your computer, open Chrome. In the address bar, enter @history. Press Tab or space. In the suggestions, you can also select Search history . Enter keywords for the page that you previously visited. Select the page from the list. Find your history by group In the 'by group' tab of your History page, Chrome organizes your browsing and search history into groups. Here, you can easily find your previous browsing activity and continue your research with related searches. On your computer, open Chrome. In the address bar, enter your search terms. Below your address bar, select Resume browsing. You can also access the 'By group' view directly from the 'Chrome history' page: On your computer, open Chrome. At the top right, select More History History. In the 'By group' tab, you can select the group that you want to review. Tips: To open all pages within a group into a new-tab group, next to the searched item, select More Open all in new tab group. At the bottom of the page, you can find suggested searches. Delete your history and browsing data Delete a site from your history On your computer, open Chrome. At the top right, select More History History. Tick the box next to each site that you want to remove from your history. At the top right, select Delete Remove. Tip: To search for a specific site, at the top, use the search bar. Remove a shortcut image from the New tab page To find the sites that you visit most, open a new tab. To remove a shortcut image: Point to the image that you want to remove. At the top right of the image, select More Remove . Remove items from your history by groups Sensitive browsing history may automatically be hidden. You can find these pages through the search box on the History page. For example, if you searched for a health topic and want to revisit that journey, type the health topic into the search box. You can manually delete a page in a group or all pages in a group. To delete a page in a group: Next to the searched item, select More Remove from history. To delete all pages in a group: Next to the group, select More Remove all from history. Post to the Help Community Get answers from community members When you make a purchase on Google Play, we'll send a confirmation email with your order information to the Google Account that you use when making your purchase. You can always see your order history on Google Play or payments.google.com. Review order history How to find your order history Using the Play Store app On your mobile device, open the Play Store . At the top right, tap your profile icon. Tap Payments and subscriptions Budget and history. Click here to view orders from play.google.com. Google Play digital content and Google Store hardware orders show together in the transactions list. Other Google payments and Google Pay transactions don't appear. Use play.google.com Go to play.google.com. At the top right, tap your Profile icon. Tap Payments and subscriptions Budget and order history. Review your orders. Using payments.google.com On your computer: Go to payments.google.com. To view order history: Individual orders: Click Activity. Subscriptions: Click Subscriptions and services. On your mobile device: Go to payments.google.com. At the top left, tap Menu . To view order history: Individual orders: Tap Activity. Subscriptions: Tap Subscriptions and services. When to expect charges You'll be charged shortly after you purchase content on Google Play. You'll see any changes to your Google Play balance appear immediately, and charges to other payment methods generally appear within a few days. If you have trouble with your order, check your status below. Tap Automatically delete Location History. Follow the on-screen instructions. In your web browser, open your Google Maps Timeline. At the bottom right, click Settings . Automatically delete Location History. Follow the on-screen instructions. What happens after you delete some or all of your Location History, some personalised experiences across Google may be degraded or lost. For example: Albums in Google Photos automatically created from places that you've visited Recommendations based on places that you've visited Real-time information about the best time to leave for home or work in order to beat the traffic Important: If you have other settings like Web & app activity turned on and you pause Location History or delete location data from Location History, you may still have location data saved in your Google Account as part of your use of other Google sites, apps and services. For example, location data may be saved as part of activity on Search and Maps when your Web & app activity setting is on, and included in your photos depending on your camera app settings. Usage & diagnostics for Location History When you turn on Location History, your device may send diagnostic information to Google about what's working and not working for Location History. If you turn Location History off, you can decide whether to share usage and diagnostics information. All usage and diagnostics information is used in accordance with Google's privacy policy. What information your device could share Your device may send information to Google to help improve Location History. For example, sent information could include: Quality and length of your connections to mobile networks, GPS, Wi-Fi networks or Bluetooth State of your location settings Restarts and crash reports Apps used to turn Location History on or off Battery levels How shared information helps Google improve Usage and diagnostics information can help improve Google apps, products and Android devices. For example, Google can use information to improve: Battery life: Google can use information about what's using the most battery on your device to help reduce battery consumption for commonly used features. Location accuracy: Google can use information from location sensors and settings to help improve location estimates for apps and services. Learn more about other location settings Post to the Help Community Get answers from community members SearchClear searchClose searchGoogle appsMain menu You can see your sign-in history, including the dates and times that your Gmail account was used. You can also see the IP addresses which were used to access your account. See your account activity On your computer, open Gmail. In the bottom right, click Details. Tip: You can also visit the Recent security events page to see security updates for your entire Google Account. Information shown on the "Activity on this account" page The "Activity on this account" page shows your sign-in records, and includes the information below. Concurrent session information In the "Concurrent session information" section, you'll see if you're signed in to Gmail on another device, browser, or location. Access type In the "Access type" section, you'll see the browser, device, or mail server (like POP or IMAP) that you accessed Gmail from. If you've authorized an application, you'll see the location (IP Address) of the 3rd party application. Location (IP address) You can see the last 10 IP addresses and approximate locations that accessed your Gmail account. If you got a warning about suspicious activity in your account, you might also see up to 3 additional IP addresses that have been labeled as suspicious. There are a few reasons you may see multiple IP addresses or locations in your activity: If you use POP or IMAP to read your mail on other services, like Apple Mail or Microsoft Outlook, this location information will be included, too. If you use Mail Fetcher, a Google IP will show up because your messages are being fetched through a Google server. If you use Gmail on a phone or tablet, your Internet service or mobile carrier's location may show up. This may be a location far from where you are. As long as the name of the carrier matches yours, this isn't unusual. Post to the help community Get answers from community members
